EDUCATION

Parsuing **Computer Science and Engineering** at **Shri Mata Vaishno Devi University,** currently at 3rd Year(5th samaster) with the GPA of 8.3 .

PROJECTS

1. **Smart Crowd and Experience Management for Pilgrimage and Tourist Sites.**
   working...
2. **AI-Based Intelligent Surveillance System for Defence Applications.**
   Developed an AI-based multimodal defence surveillance system that enhances visibility through image dehazing and detects and classifies objects as Friend or Foe (IFF) using intelligent AI models.
3. **Smart Medicine Reminder System Using Arduino**
   An Arduino-based system that uses an RTC module and servo motors to automatically open the medicine box at scheduled times, with an LCD display for medication reminders.
4. **Scintific Calculator**
   built an scintific calculator using html css and JavaScript only.
5. **Cinema Hall Ticket Booking System in C lenguage**
   built this using 2D arrays, structures, pointers, and linked lists in c lenguage.
6. **Extrovert and Introvert Classifier Using Logistic Regression**
   Built the frontend using HTML, CSS, and JavaScript, integrated the ML model with Python(FLASK), and deployed the application on Render.

SKILLS

1. Python
2. C programming
3. OOP in Java
4. HTML,CSS and JS
5. Machine Learning in python
6. Amazon Web Services
7. MySQL
8. Data Structure and Algorithms in C
9. Data Visualization using python and Tablue

AWARDS and ACTIVITIES

- In Vikalp (student initiative like NGO)
- NSS (National Service Scheme) as volunteer
- 3rd Prize on Raksha-AI hackathon
